| Description | A cross-recessed, hex head machine screw with two free-spinning, captive washers. Directly below the hex head is a helical split lockwasher; beneath the split lockwasher is a round flat washer. |  |  |
| :---: | :---: | :---: | :---: |
| Applications/ Advantages | This double washer sems screw is typically a more economical alternative to a patented conical washer sems screw. The phillips hex variety is preferred in the electronics industry where initial installation is performed with a nut driver, but the finished product has minimal clearance requiring a phillips driver to loosen the screw. |  |  |
| Component | Screw | Split Lockwasher | Flat Washer |
| Material | Class 4.8 carbon steel | Split lockwashers shall be made from a carbon steel that conforms to the following chemical composition requirements: Carbon: 0.54-0.81\%; Silicon: 0.15 - 0.35\%; Manganese: 0.30-0.90\%; Phosphorus: 0.030\% max.; Sulfur. 0.030\% max. | Plain washers shall be made from a carbon steel that conforms to the following chemical composition requirements: Carbon: 0.12\% max.; Manganese: 0.50\% max.; Phosphorus: 0.040\% max.; Sulfur. 0.045\% max. |
| Hardness | Rockwell B 71 minimum | Rockwell C 42-50 | Rockwell B 60 maximum |
| Plating | Sems are available in zinc yellow and clear zinc finishes, and baked after plating. |  |  |
